ADVANCE LIFTS WARRANTY

For a period of one year from date of shipment from the Company's plant, the Company agrees to replace or repair, free of charge, any defective parts, material or workmanship on new equipment. This shall include electrical and hydraulic components.

For a period of ten years or 250,000 cycles (whichever occurs first) from date of shipment from Company's plant, the Company agrees to replace or repair any defective structure.

Company authorization must be obtained prior to the commencement of any work. The Company reserves the right of choice between effecting repairs in the field or paying all freight charges and effecting the repairs at the Company's plant. The Company further reserves the right of final determination in all warranty considerations. Evidence of overloading, abuse or field modification of units without Company approval shall void this warranty. No contingent liabilities will be accepted.

ADVANCE LIFTS ULTRA HIGH CYCLE WARRANTY

STRUCTURAL PORTION:

For a period of ten (10) years or 3,000,000 cycles (whichever occurs first) from date of shipment from the Company's plant, the Company agrees to replace or repair, any defective parts, material or workmanship in the lift structure. This includes axles, bearings and cylinders, but not cylinder packings.

POWER UNIT PORTION:

For a period of one year from date of shipment from the Company's plant, the Company agrees to replace or repair any defective parts. This shall include all electric and hydraulic components including cylinder packings.

Company authorization must be obtained prior to the commencement of any work. The Company reserves the right of choice between effecting repairs in the field or paying all freight charges and effecting the repairs at the Company's plant. The Company further reserves the right of final determination in all warranty considerations. Evidence of overloading, abuse or field modification of units without Company approval shall void this warranty. No contingent liabilities will be accepted.

EXPECTED LIFE VERSUS WARRANTY LIFE

We at Advance Lifts base our warranties on units being used at maximum capacity and full range of motion on every cycle. In most real world applications, this is not the case. Most units are usually cycled only a portion of their full range and are only loaded to maximum capacity occasionally, if ever. This means that most lifts last much longer than the warranty period. In normal operating environments, we expect the average unit to last several times the warranted cycle limit. It is not unusual for our parts department to sell consumable parts (wheels or packing kits) for units that are more than 25 years old and still going strong. The keys to reaching expected lives well beyond warranty are avoiding abuse and attending to maintenance.
