

Key Reasons To Use A Periodic Maintenance Program For Your Advance Dock Lift

Safety is a Priority

A poorly maintained lift can become a safety hazard and a liability to your business. If your lift breaks down or causes injury, your business suffers. Let a factory certified technician, who knows your lift better than anyone in the industry, make certain that your investment operates efficiently and safely for years to come.

Factory Certified Service Personnel

Factory certified Advance Lifts technicians know your equipment inside and out. They are some of the best trained technicians in the country with the correct tools and knowledge to ensure your lift is maintained properly.

Comprehensive Inspection

The Advance Lifts periodic maintenance program has a 25-point system check list that is one of the industries most inclusive programs. The system check list identifies and inspects all the critical elements of your equipment. Small problems will not be overlooked thus making sure big problems are less likely to occur.

Replacement Parts Availability

Factory certified representatives have access to every part and accessory your equipment could ever need and the Advance factory is known for its quick response when providing replacement parts.

Documentation of Work Performed

Upon completion of every inspection a detailed report is generated noting that all items have been checked and notes any items that require further inspection or replacement at a later date. This report becomes a maintenance log that allows any factory certified technician to pick up right where the last mechanic left off saving both time and money.

Satisfaction Guarantee

If, for any reason, you are not completely satisfied with the work performed your factory certified technician will return at no cost to make things right.

Your local authorized Advance Lifts Dealer is:

THE ADVANCE WARRANTY

For a period of one year from date of shipment from the Company's plant, the Company agrees to replace or repair, free of charge, any defective parts, material or workmanship on new equipment. This shall include electrical and hydraulic components.

For a period of ten years or 125,000 cycles (whichever occurs first) from date of shipment from Company's plant, the Company agrees to replace or repair any defective structure.

Company authorization must be obtained prior to the commencement of any work. The Company reserves the right of choice between effecting repairs in the field or paying all freight charges and effecting the repairs at the Company's plant. The Company further reserves the right of final determination in all warranty considerations. Evidence of overloading, abuse or field modification of units without Company approval shall void this warranty. No contingent liabilities will be accepted.

ALONG WITH THE BEST WARRANTY IN THE BUSINESS, EVERY PERIODIC MAINTENANCE INSPECTION INCLUDES:

- Raise the lift to full height to check the operation and clear any oil buildup from the cylinder housings.
- Clean debris from pit, or under dock lift
- Examine hydraulic hoses for wear or damage
- Check that main axle retaining rings are in place and seated
- Check main axles bushings for wear
- Check main axle pins for wear
- Inspect roller wheels for signs of wear, flat spots and sticking
- Check that all wheel pin retaining clips are in place and seated properly
- Check wheel pins for wear and damage
- Inspect cylinders for leaks
- Inspect cylinders for properly seated retaining clips
- Inspect cylinder mounting pins for signs of wear
- Examine hydraulic fittings for cracks or leaks
- Inspect handrails for cracks or damage
- Inspect safety chains
- Check travel limit switches for proper function
- Examine bridge hinge for cracks or broken welds
- Inspect bridge chains
- Lubricate bridge hinge
- Inspect hydraulic fluid level and check for contamination*
- Inspect power unit for leaks
- Inspect suction filter
- Check breather filter
- Inspect pushbutton for proper function
- Inspect operator cord for wear and damage

***Advance Lifts recommends that you have your hydraulic oil changed annually.**
