Container Dumpers
When Durability Matters

ULTRA HIGH PERFORMANCE DUMPER
180 Degree Dump Rotation
5 Year - 1,000,000 Cycle Warranty
22 Cycles/Hour - 3 Shifts/Day
***** Quick Reverse - Load Shuffle**

HIGH PERFORMANCE DUMPERS
180 Degree Dump Rotation
5 Year - 500,000 Cycle Warranty
11 Cycles/Hour - 3 Shifts/Day

HIGH REACH DUMPERS
135 Degree Dump Rotation
5 Year - 250,000 Cycle Warranty
72" to 120" Dump Heights

HEAVY DUTY DUMPERS
135 Degree Dump Rotation
5 Year - 250,000 Cycle Warranty
10 Cycles/Hour - 2 Shifts/Day

STANDARD DUMPERS
125 Degree Dump Rotation
10 Year - 250,000 Cycle Warranty
6 Cycles/Hour - 1 Shift/Day

DUMPER ACCESSORIES

Container dumpers are used to empty the contents of containers onto a variety of receivers. Packages, parcels and mail items are poured onto conveyor lines. Trash containers may be emptied to sorting lines or poured into larger containers for transport or directly into compacting machinery. Grains, powders and liquids are poured into large vats or ovens. We have seen a wide variety of applications which all are very unique and they have allowed us to develop a large assortment of options to modify our equipment to fit your exact needs.

There are (5) dumper groups to choose from. The Ultra High Performance Dumper (UHPDP) is designed for very high performance applications with problem loads that may require shuffling in order to fully empty containers, even though they are fully inverted. These can be programmed for automated cycles. The High Performance Dumper (HPDP) is a simplified version of the (UHPDP) that eliminates the shuffling and automation features, but retains the 180 degree rotation to the inverted bin position and the extremely high duty cycle capabilities. The Standard Dumper (DP) is designed for the most common applications and is designed with the most compact footprint possible. The Heavy Duty Dumper (HDDP) is more robust than the standard duty dumper and provides higher cycle rates. The High Reach Dumper (HRDP) consists of a dumping carriage that is elevated to the desired height and then dumped. The structure is every bit as robust as the heavy duty dumper.

The warranties vary by model type, but in all cases they exceed anything else offered in the industry. As with all Advance Lifts warranties, the expected life of our equipment greatly exceeds the stated warranty life. Be sure to compare warranties when comparing pricing.

The models shown in our selection charts should only be considered starting points. Whether your bid request is for 100 units or a single unit, we would be pleased to put our vast experience in dumper design to work for you to come up with a design that fits your specific needs.

We offer the most standard models in the industry & have extensive special design capabilities.
